

APPLICATION BRIEF - 52/0610

INDUSTRY: AGRICULTURAL CHEMICAL PROCESS
 PRODUCT: IMI PBM TANK BOTTOM VALVE
 MEDIA: CHEMICALS

IMI PBM Solution:

The customer needed a valve using zirconium as the valve's material of construction for a specific chemistry in a customer's agricultural chemical process. This vessel will have the general condition of high pH and high temperature. The nature of the process had been developed by the customer over time at another location, and we were told that zirconium was the definitive choice of valve material
