

APPLICATION BRIEF - 37/0908

INDUSTRY: PHARMACEUTICAL RESEARCH

PRODUCT: INSTRUMENT ROOT VALVES

MEDIA: NITROGEN MIXED WITH SOLVENT

IMI PBM Solution:

A major pharmaceutical manufacturer required these valves for critical instrument isolation, 1000 PSIG at 300°C. The environment was corrosive due to the vapors produced from the mixture of nitrogen with solvent. The customer purchased IMI PBM's instrument valves due to their success with IMI PBM's Self Cleaning Ball Valves.
