

APPLICATION BRIEF - 56/1010

INDUSTRY: PETROLEUM

PRODUCT: FABFLEX® PIG CAPTURE MANIFOLD

MEDIA: VARIOUS GRADES OF LUBE OIL

IMI PBM Solution:

A major petroleum company requested a unique manifold design that allowed for capture and launch of line "PIGS." This Fabflex® Pig Capture Manifold allows for pig capture or launch at either end or at any point between on a process line. The manifold also allows for process fluid draining, end of line pig removal, and compressed air inlet for pig launch. These features were incorporated into an assembly which only occupies 18" of the main process line.
