

APPLICATION BRIEF - 58/1010

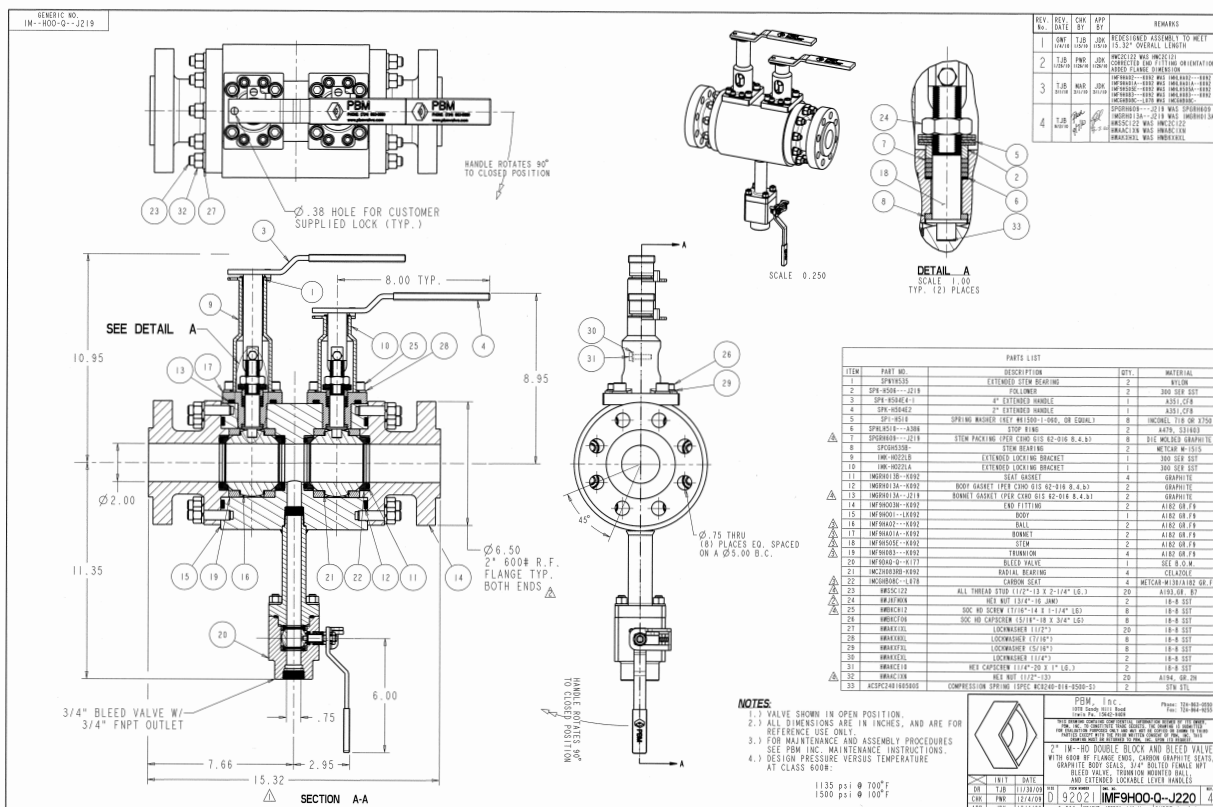

INDUSTRY: REFINING

PRODUCT: 2-INCH FULL PORT 600# CLASS DOUBLE BLOCK AND BLEED VALVE

MEDIA: HYDROCARBONS - OIL SANDS CRUDE

IMI PBM Solution:

A major petroleum company specified PBM double block and bleed valves for isolating high pressure coker hydrocarbons from sensitive instrument gauges. PBM's Double Block and Bleed valves with 600# flanges and carbon-graphite seats and seals provided safe and reliable isolation of high pressure media in a smaller envelope compared with competitive gate valve designs.
