IMI PBM

Breakthrough  
engineering for  
a better world

IMI PBM valves combine specific application requirements with creative engineering and quality manufacturing. We offer the convenience of all IMI PBM standard features, as well as customization of any product line to fulfill unique customer requirements. Most of our valves incorporate our unique Adjust-O-Seal® Technology or True Bore® design, which allows for fewer process interruptions, longer life and improved product yields.

We proudly serve both the Sanitary and Industrial markets across the globe. Industry examples include Pharma & Biotech, Food & Beverage, Consumer, Oil & Gas, Marine and Cryogenic. Our innovative Sanitary line encompasses a wide range of valves - Radial Diaphragm, Sampling, Check, Pinch, Flush Tank, Multi/Diverter Port, Double Block and Bleed, Clean Steam and Fire Tested. Our Industrial line features 2-Way, Angle Stem Flush Tank, ANSI, Multi/Diverter Port, Cryogenic, Double Block and Beed, Instrument, Pigging, PSV and Transmitter Isolation.

IMI PBM is the Ideal Valve Solution. Let us reduce processing costs and improve efficiency for you and your customers.

## IMI PBM QUICK FACTS

### Creative Engineering and Quality Manufacturing

Origin Name: Pittsburgh Brass Manufacturing

Founded 1899, Pittsburgh, Pennsylvania

Non-Ferrous Foundry in the early days

First Ball Valve shipped 1960

Irwin location constructed 1968

All manufacturing, test and assembly in Irwin

Acquired by IMI plc 2019

Customized Metallic and Non-Metallic  
Valve Systems

Over 50 countries served worldwide

Built on helping you focus on production  
not maintenance
