

Stack Silencers

*Engineering
GREAT Solutions*

**Custom-engineered stack
silencers for simple and combined
cycle power generation**

Stack Silencers

Our silencers provide the required attenuation for predominant, very high frequency noise. The rugged silencer panel is designed to treat noise in the aggressive service conditions of turbine exhaust.

Key features and benefits

- > Modular acoustic panel with no welded or bolted joints – no special tools required for maintenance
- > Free expansion structural design – thermally compensated for temperature extremes
- > Low pressure drop design

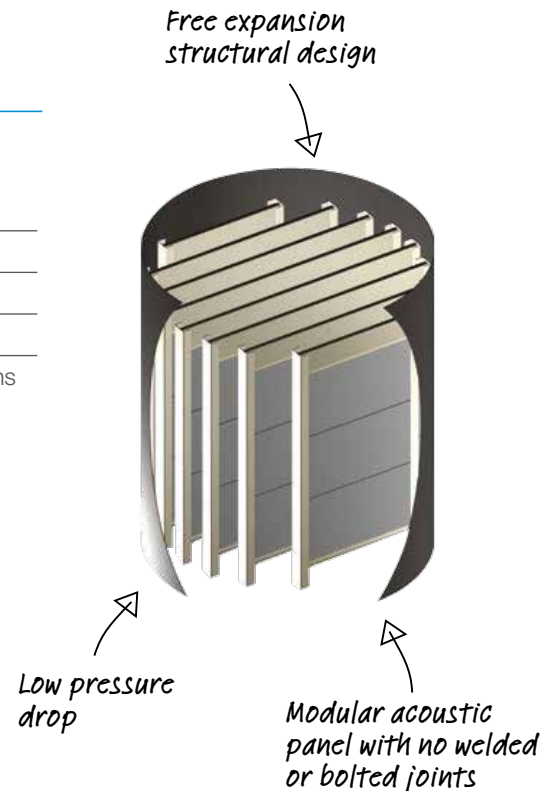

Custom designed to specifications

Technical Description

Body	Axial Flow*
Shell Material	Carbon steel / Stainless steel
Baffle material	Carbon steel / Stainless Steel
Temperature range	-50 °C / full turbine exhaust temp
Custom designed	Designed to exact customer specifications
