

Industry: Petroleum
 Product: Fabflex® Pig Capture Manifold
 Media: Various grades of Lube Oil

Application Brief: A major petroleum company requested a unique manifold design that allowed for capture and launch of line "PIGS." This Fabflex® Pig Capture Manifold allows for PIG capture or launch at either end or at any point between on a process line. The manifold also allows for process fluid draining, end-of-line PIG removal, and compressed air inlet for PIG launch. These features were incorporated into an assembly which only occupies 18" of main process line.
