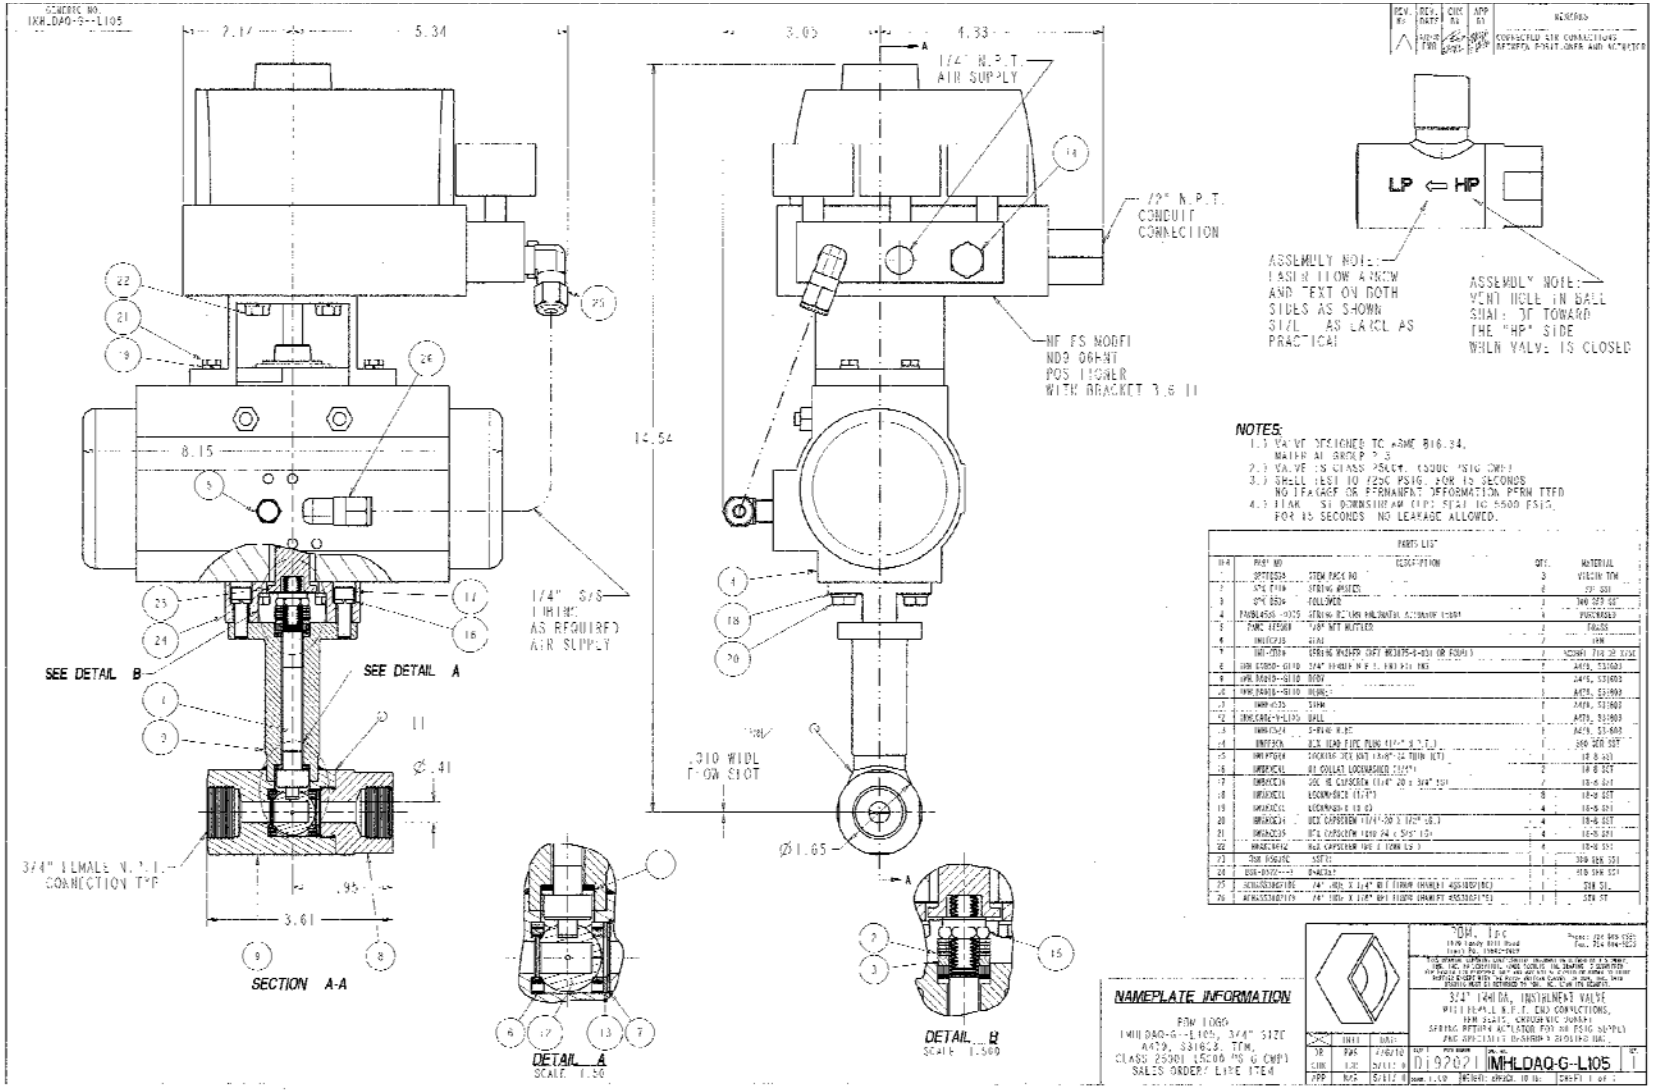
Industry: Petroleum
Product: ¾-inch Instrument Valve with Slotted Ball and Cryogenic Bonnet
Media: Nitrogen Gas

www.pbmvalve.com



Application Brief: A major petroleum company required a instrument valve to control the flow of nitrogen gas injected into wells to force oil to the surface. The application required a cryogenic design capable of handling extreme temperature and pressure ratings, a slotted ball for flow control, and an automation and controls package that provided the safety and reliability of a tight shut-off.
