

PBM INDUSTRIAL DIVERTER STEAM VALVES

3-Way DD Series 5, 1/2" - 4"

DESIGN FEATURES:

- Unique Adjust-O-Seal® feature allows in-line valve adjustment to compensate for normal wear on valve seats. Note: **DD Series valves have o-rings.**
- Integral side-entry or bottom entry common port. Seats shall provide both upstream and downstream bubble-tight seal and be adjustable for inline wear.
- A single Diverter valve can replace two or three 2-Way valves to reduce cost and space.
- Full-port diameters minimize pressure drops (1/2 - 4")
- Stem assembly accommodates PBM Direct Mount Actuation for accurate alignment and increased cycling life.
- A Diverter Port ball valve can be an economical alternative to a 3-Way Multi-port valve depending on the sealing requirements.
- Valves are rated to full vacuum.
- Specify PBM flow pattern
- Using a welded connection on the common port of a DP valve may complicate maintenance. Provisions must be made to allow removal of end fittings and body from the line. PBM recommends Female NPT (Q-) or flanged end fittings for common port connection for ease of valve maintenance.

SPECIFICATIONS	DIVERTER VALVES
Sizes	1/2" - 4" Series 5
Material	316/316L, Hastelloy™ C-276, Carbon Steel, others available
Temperatures	Ambient for V-TEF™ to 400° F, S-TEF® to 450°F
End Connections	Flange, NPT, Socket weld
O-rings	EPR O-ring energizer (Viton V1274-75/80, EPR E3608-70, others available)
Seats, Seals and Stem Packings	V-TEF™ and S-TEF®
Body Bolts & Nuts	18-8 Stainless Steel
Maximum Working Pressure	up to 900 psig CWP depending on valve series, size and temperature
